Income Eligible Class - Eligibility screening information

The Federal Poverty Guidelines considers family size and family gross earned and gross unearned income to determine poverty levels. Family size is defined as one of the following:

- All parents/legal guardians of the child residing in the home and all minor children of the parent/legal guardian who are residing in the home
- Unmarried parents of a common child who reside in the same home and all the minor children who live with them
- A foster parent and all the minor children who reside in the home

## Gross earned and gross unearned income is defined as:

- Gross earned income is the total amount of earnings received in a month by all of the employed individuals in the family including wages legally obligated to all members of the family, but which are diverted to a third party. Examples include wages, salary, severance pay, bonuses, sick leave paid as wages, annual leave, holiday, and vacation pay. These include payments received before taxes and other deductions, for services performed as an employee, or by an individual as a result of self-employment.
- Gross unearned income is the income not earned from employment or self-employment received in the month by all members of the family. Examples of unearned income include cash contributions received by the family from persons, organizations, or assistance agencies.
